CANOPTEK MACROCYTE REANIMATOR

APL	MOVE	SAVE	WOUNDS
2	7"	4+	7

Reanimate: Once per turning point, when another friendly **CANOPTEK CIRCLE** operative would be incapacitated, if that operative is visible to and within 6" of this operative, or if this and that operative are within your **OBELISK NODE MATRIX**, you can use this rule, providing neither this nor that operative is within control range of an enemy operative. If you do, that friendly operative isn't incapacitated, has 1 wound remaining and cannot be incapacitated for the remainder of the action. After that action, that friendly operative can immediately perform a free **Dash** action, but must end that action within this operative's control range or within your **OBELISK NODE MATRIX**. Subtract 1 from this and that operative's APL stats until the end of their next activations respectively, and if this rule was used during that friendly operative's activation, that activation ends. You cannot use this rule if this operative is incapacitated, or if it's a **Shoot** action and this operative would be a primary or secondary target.

NANOSCARAB BEAM — 1AP

- Select one friendly **CANOPTEK CIRCLE** operative visible to and within 6" of this operative. Alternatively, if this operative is within your **OBELISK NODE MATRIX**, you can select one other friendly **CANOPTEK CIRCLE** operative within your **OBELISK NODE MATRIX**. The selected operative regains up to 3D3 lost wounds. It cannot be an operative that the Reanimate rule was used on during this turning point.

- This operative cannot perform this action while within control range of an enemy operative, or more than once per turning point.
