DEATHWATCH

FACTION EQUIPMENT

AMMUNITION RESERVE

Awarded to kill teams whose marksmanship is as efficient as it is lethal, additional caches of individually crafted shells, fuel canisters and ammunition cells serve to secure victory during the most dangerous missions.

Once per battle, you can use the Special Issue Ammunition faction rule for up to two **Shoot** actions during one turning point, but you must select different weapon rules for both uses. This takes precedence over the normal Special Issue Ammunition rules.
