EXODITE DRAGON MASTER

LEYSTALKER UPGRADE

ELUSIVE PHANTASM

Leystalkers are constantly on the move. They scout the triad's hunting ground, seek the foe's position and test their strengths, all while slipping through the enemy's clutches again and again. Their skills have led a number of the Exodites' foes to believe them some kind of insubstantial spirit. While the enemy's paranoia grows, a Leystalker is already drawing a bead on them from yet another unexpected angle.

At the end of each Firefight phase, if this operative isn't within control range of enemy operatives, it can perform a free **Sprint** or **Turn** action, but it cannot move more than 3" during that action and its **SPEED** remains the same. Note that it must still have the necessary amount of movement allowance remaining this turning point.
