***Feast:** Whenever this operative is using this weapon against a wounded operative, add 1 to the Atk stat of this weapon and it has the Lethal 5+ weapon rule.

Group Activation: Whenever this operative is expended, you must then activate one other ready friendly **GELLERPOX INFECTED MUTOID VERMIN** operative (if able) before your opponent activates. When that other operative is expended, your opponent then activates as normal (in other words, you cannot activate more than two operatives in succession with this rule).
