HAND OF THE ARCHON

FACTION EQUIPMENT

TOXIN COATING

Drukhari raiders are known to coat their blades in venom, ensuring that even the slightest nick of blade against flesh is fatal.

Up to twice per turning point, whenever a friendly **HAND OF THE ARCHON** operative is fighting or retaliating and you're selecting a melee weapon, you can use this rule. If you do, until the end of that sequence, that operative's melee weapon has the Lethal 5+ weapon rule.
