HUNTER CLADE

FACTION EQUIPMENT

RAD BOMBARDMENT

With a short binharic transmission, the Hunter Clade call down a radioactive bombardment. Mortar rounds rain down, emitting swathes of irradiating energy that flush the enemy from cover or force them to retreat from critical objectives.

Once per battle **STRATEGIC GAMBIT** in any turning point after the first. Select one objective marker or your opponent's drop zone. Roll one D6 separately for each enemy operative within control range of that selected objective marker or within that drop zone, and subtract 1 if any part of that enemy operative's base is underneath Vantage terrain: on a 4+, subtract 1 from that operative's APL stat until the end of its next activation; on a 6, also inflict D3 damage on it (roll separately for each).
