VESPID STINGWING
FIREFIGHT PLOY

NEUTRON OVERLOAD

Augmented in some ineffable fashion by the rapid wing beats of the Vespids, their neutron weaponry can unleash horrific point-blank energy blasts.

Use this firefight ploy when you resolve a critical success for a friendly **VESPID STINGWING** operative that's shooting with a neutron weapon during an activation in which it's moved or used **FLY**. If the target is within 4" of it, inflict D3 additional damage.
