Adaptive Swordsmanship: You can ignore any changes to the Hit stat of this operative's xenophase blade. Whenever this operative is fighting or retaliating, you can resolve one of your successes before the normal order. If you do, that success must be used to block.

***Phase Sweep:** Whenever this operative performs the **Fight** action with this weapon profile, if it isn't incapacitated, it can immediately perform a free **Fight** action afterwards, but you must select this weapon profile and it can only fight against each enemy operative within its control range once per activation or counteraction using this weapon profile. This takes precedence over action restrictions, and you can continue to perform free **Fight** actions until this operative is incapacitated or has fought against every enemy operative within its control range.
