DEATHWATCH

FACTION EQUIPMENT

SANCTUS-V BIOSCRYER CUFFS

Developed by Techmarines and Apothecaries of the Castilos Nullifact watch fortress, these vambrace-mounted monitron relays offer unparalleled analysis and purgation of a range of bio-threats to the wearer's augmented physiology.

Once during each friendly DEATHWATCH operative's activation, before or after it performs an action, if it's not within control range of enemy operatives, you can use this rule. If you do, select one of the following:

- That friendly operative regains up to D3 lost wounds.
- Remove any changes to that friendly operative's APL stat.
- Remove one of the following tokens that friendly operative has (before that token's activation effects are resolved, if relevant): Neutron Fragment, Poison, Terrorchem.
