EXODITE DRAGON MASTER

FIREFIGHT PLOY

LEAP

The preternatural agility and corded muscles of drakesteeds enable them to rapidly reposition in a single, nimble motion.

Use this firefight ploy when a friendly **EXODITE DRAGON MASTER MOUNTED** operative performs the **Sprint** action. Instead of moving that operative, remove it from the killzone and set it back up in a location it can be placed within 1" horizontally of its original location. This distance cannot be measured through terrain features more than 2" tall, and that operative cannot be set up on Vantage terrain higher than 2" from the killzone floor. That operative is treated as having moved 3" for the purposes of its movement allowance and has **SPEED 3-**.
