FELLGOR RAVAGER
STRATEGY PLOY

PELTING FIREPOWER

Though it may lack accuracy, the combined firepower of a group of Fellgor Ravagers is rendered lethal by its volume.

Whenever a friendly **FELLGOR RAVAGER** operative is shooting an enemy operative that's been shot by another friendly **FELLGOR RAVAGER** operative during this turning point, that first friendly operative's ranged weapons have the Ceaseless weapon rule; if the enemy operative has been shot by more than one other friendly **FELLGOR RAVAGER** operative during this turning point, that first friendly operative's ranged weapons have the Relentless weapon rule instead.
