GELLERPOX INFECTED

FACTION EQUIPMENT

POLLUTED STOCKPILE

As defenders prepare to repel the infected, they find their own weapons and equipment degraded by the Gellerpox's corroding influence.

After revealing this equipment option, roll 2D6: on a 7+, remove one of your opponent's selected equipment options; otherwise, that player removes one of their own selected equipment options. They cannot select that equipment again during the game sequence (e.g. in the Scouting step of Approved Ops). You cannot select this equipment option after the Select Operatives step.
