GELLERPOX INFECTED

FACTION RULE

MUTOID VERMIN

Tiny pests become monstrous threats under the effects of the Gellerpox, but are still grubs that can be ignored by highly trained warriors.

MUTOID VERMIN operatives cannot perform any actions other than **Charge**, **Dash**, **Fall Back**, **Fight**, **Reposition** and **Shoot**, or use any weapons that aren't on their datacard. They can perform the **Fall Back** action for 1 less AP.

MUTOID VERMIN operatives cannot contest markers or areas of the killzone, and are ignored for your opponent's kill/elimination op (when they're incapacitated, and when determining your starting number of operatives). They're also ignored for victory conditions and scoring VPs if either require operatives to 'escape', 'survive' or be incapacitated by enemy operatives (if they escape/survive/are incapacitated, determining how many operatives must escape/survive/be incapacitated, etc.).

CONTINUES ON OTHER SIDE ▶

Operatives can move through **MUTOID VERMIN** operatives, and enemy operatives can move within control range of them. Having only **MUTOID VERMIN** operatives within their control range doesn't prevent enemy operatives from performing the **Charge**, **Dash** and **Reposition** action, and enemy operatives can leave **MUTOID VERMIN** operatives' control range when performing the **Charge** action.
