HUNTER CLADE

FIREFIGHT PLOY

CONTROL EDICT

The leader of a Hunter Clade assumes partial control of another member of their kill team, coordinating precision strikes with the nearby operative.

Use this firefight ploy when it's your turn to activate a friendly operative. Select one friendly HUNTER CLADE **LEADER** operative and one other ready friendly HUNTER CLADE operative visible to and within 3" of that **LEADER** operative; activate one of them as normal. When that first friendly operative you activate is expended, you can activate the other friendly operative before your opponent activates. When that other operative is expended, your opponent then activates as normal. Whenever you use this ploy, you cannot select more than one HUNTER CLADE **SICARIAN** operative.
