HUNTER CLADE

FIREFIGHT PLOY

OMNISSIAH'S IMPERATIVE

The most extreme form of doctrina imperative, this protocol pushes an operative's wiring beyond safe limits, providing additional combat power at the cost of burned circuitry and charred flesh.

Use this firefight ploy during a friendly **HUNTER CLADE** operative's activation. Alternatively, use it when an enemy operative is shooting a friendly **HUNTER CLADE** operative, at the end of the Roll Attack Dice step. Until the Ready step of the next Strategy phase, that friendly operative has an additional rule determined by its current **DOCTRINA IMPERATIVE** as follows:

- Protector: This operative's ranged weapons have the Severe weapon rule.
- Conqueror: Whenever this operative is fighting, after resolving your first attack dice during that sequence, you can immediately resolve another (before your opponent).

CONTINUES ON OTHER SIDE ▶

- Bulwark: Improve this operative's Save stat by 1. In addition, whenever an operative is shooting this operative, you can collect and roll one additional defence dice. If you use this ploy during a **Shoot** action, this operative's Save stat is changed immediately (this takes precedence over the core rules).
- Aggressor: You can ignore the first vertical distance of 2" this operative moves during one climb up.
- Neutral: None.

Note that you can use this ploy after rolling attack or defence dice for this operative, or before or after retaining or re-rolling those dice.
