STRATEGY PLOY

DENOUNCE

None escape the long arm of the Inquisition. Those denounced and proclaimed guilty quail before its vengeful Agents.

Select one enemy operative and roll one D3. In the Firefight phase of this turning point, that enemy operative cannot be activated or perform actions until it's the last enemy operative to be activated, or your opponent has completed the activation of a number of enemy operatives equal to the result of the D3 (whichever comes first). This ploy costs you 1 additional CP for each previous time you've used it during the battle (e.g. 1CP the first time you would use it, 2CP the second time, etc.).
