NEMESIS CLAW

STRATEGY PLOY

RETURN TO DARKNESS

The Night Lords move from shadow to shadow with an agility and speed belied by their transhuman bulk.

One friendly NEMESIS CLAW operative can immediately perform a free **Fall Back** or **Reposition** action, but it must end that move with Heavy terrain within its control range, or any part of its base underneath Vantage terrain. In addition, it cannot move more than 4" during that action and it cannot end that move closer to enemy operatives (in a killzone that uses the close quarters rules, e.g. Killzone: Tomb World, ignore Wall terrain when determining this).
