PATHFINDER

FACTION EQUIPMENT

TARGET ANALYSIS OPTIC

Advanced optics enhance the effectiveness of markerlights, ensuring the bearer's shots find their mark with unerring accuracy.

Once per turning point, when a friendly **PATHFINDER** operative (excluding **DRONE**) is performing the **Shoot** action and you're selecting a valid target, you can use this rule. If you do, until the end of that action, if the target has at least one of your Markerlight tokens, it's treated as having one more. If the ranged weapon has the Blast or Torrent weapon rule, only the primary target is affected.
