Neuropredatory Crest: Whenever determining control of a marker, treat the total APL stat of enemy operatives that contest it as 1 lower if at least one of those enemy operatives is within 3" of this operative. Note this isn't a change to the APL stat, so any changes are cumulative with this. Whenever an enemy operative is within 3" of this operative:

- Your opponent must spend 1 additional AP for that enemy operative to perform the **Pick Up Marker** and mission actions.
- Your opponent cannot re-roll their attack or defence dice for that operative.

Synaptic Link: STRATEGIC GAMBIT if this operative isn't incapacitated. Roll one D6 and compare the result to the number of the current turning point; if the result is:

- Twice as high or higher, you gain 1CP.
- Less, inflict damage on this operative equal to the result.
- Any other result, nothing happens.
