RAVENER

FACTION RULE

BURROW

Raveners will emerge from their tunnels to strike at unsuspecting victims, then disappear again before their foe can properly react.

When setting up a RAVENER kill team before the battle, your first two operatives must be set up as normal. Each other friendly RAVENER operative thereafter can be set up underground: place it to one side instead of in the killzone.

In the Firefight phase, friendly RAVENER operatives set up underground are activated and can counteract as normal. Whenever a friendly RAVENER operative is underground, it cannot perform any actions other than **Burrow**. At the end of the battle, each friendly RAVENER operative that's underground is incapacitated.

CONTINUES ON OTHER SIDE ▶

Friendly **RAVENER** operatives can perform the following unique action:

BURROW 1AP

- If this operative is underground, set it up on your **TUNNEL** in a location it can be placed (it's no longer underground, and it can be set up within control range of enemy operatives). Until the end of the activation/counteraction, subtract 2" from its Move stat.
- Alternatively, instead of resolving the above effect, if this operative is in the killzone and on your **TUNNEL**, remove it from the killzone: it's now underground.

- An operative cannot perform this action while carrying a marker, or if it isn't either underground or on your **TUNNEL**.
