SPECTRE SQUAD

FACTION EQUIPMENT

STARSHELL FLARE

While starshells are commonly used by the Imperial Guard for battlefield illumination, these wily veterans employ them to stun and distract.

STRATEGIC GAMBIT. One friendly **SPECTRE SQUAD** operative can immediately perform a free **Stun Grenade** action (see universal equipment). Performing this action using this rule doesn't count towards its action limits (i.e. if you also select that grenade from equipment). When an enemy operative's APL stat is changed as a result of this **STRATEGIC GAMBIT**, you cannot use this equipment for the rest of the battle.
