VESPID STINGWING
STRATEGY PLOY

AERIAL AGILITY

Vespids jink and weave through the air, following unpredictable flight paths that confound foes who have not had time to line up clean shots.

Whenever an operative is shooting a friendly **VESPID STINGWING** operative while counteracting or interrupting, or during an activation in which that shooting operative moved or was set up, roll one D6 whenever an attack dice would inflict Normal Dmg: on a 5+, ignore that inflicted damage. You cannot ignore more than one attack dice per **Shoot** action sequence this way.
