**Quick Draw:** Once per turning point, when an enemy operative is performing the **Shoot** action and this operative is selected as the valid target (or if it will be a secondary target from the Blast weapon rule), if this operative is ready, you can interrupt that action to use this rule. If you do, this operative can immediately perform a free **Shoot** action with its dual Kroot pistols (focused) against that enemy operative (you can change its order to Engage to do so), but that enemy operative must be a valid target.

\***Salvo:** Select up to two different valid targets that aren't within control range of friendly operatives. Shoot with this weapon against both of them in an order of your choice (roll each sequence separately).
