GRISLY MARK

2AP

- ▶ Place your Grisly marker within this operative's control range.
- Whenever an enemy operative is within 3" of your Grisly marker, your opponent must spend 1 additional AP for that enemy operative to perform the **Pick Up Marker** and mission actions.
- Whenever determining control of a marker, treat the total APL stat of enemy operatives that contest it as 1 lower if at least one of those enemy operatives is within 3" of your Grisly marker. Note this isn't a change to the APL stat, so any changes are cumulative with this.
- ◆ This operative cannot perform this action more than once per battle, and cannot perform it while within control range of an enemy operative.
