

- Within 3" horizontally of one of your Drop markers, or wholly within your drop zone.
- Not within control range of enemy operatives (unless you're setting up a **PRECURSOR** operative, which can be set up within control range of an enemy operative).
- With no part of its base underneath Vantage terrain.
- With an order of your choice.

The operative is treated as performing the **Reposition** action (spend the AP accordingly), then continue its activation as normal. It's obscured until the end of the next activation or the end of the turning point (whichever comes first).

Less than half of your operatives can be set up above by the end of the first turning point. In other words, by the end of the first turning point, more than half of your operatives must have been set up in the killzone during the battle.

When readying your operatives during the second and third turning points, remove one of your Drop markers. This means operatives still set up above are incapacitated at the end of the second turning point.
