

ANGEL OF DEATH

FACTION EQUIPMENT

TILTING SHIELDS

As well as displaying company colours and personal heraldry, a Space Marine's tilting plate serves to protect the bearer in the press of melee combat.

Once per turning point, when a friendly **ANGEL OF DEATH**  operative is fighting or retaliating, after your opponent rolls their attack dice, but before re-rolls, you can use this rule. If you do, your opponent cannot retain attack dice results of less than 6 as critical successes during that sequence (e.g. as a result of the Lethal, Rending or Severe weapon rules).
