

Whenever one of your **OBELISK NODE** markers is within 6" horizontally of another of your **OBELISK NODE** markers, those markers and the area between them create an **OBELISK NODE MATRIX** above and below (in other words, their height in the killzone is irrelevant). If all three of your **OBELISK NODE** markers fulfil this, it creates a larger combined **OBELISK NODE MATRIX**.

Whenever a friendly **CANOPTEK CIRCLE** operative is within your **OBELISK NODE MATRIX**:

- Weapons on its datacard have the Accurate 1 weapon rule.
- Add 1 to its APL stat (to a maximum of 3).

Within 6" creates an **OBELISK NODE MATRIX**
