

DEATHWATCH

FACTION EQUIPMENT

SANCTUS-V BIOSCRYER CUFFS

Developed by Techmarines and Apothecaries of the Castilos Nullifact watch fortress, these vambrace-mounted monitron relays offer unparalleled analysis and purgation of a range of bio-threats to the wearer's augmented physiology.

Once during each friendly **DEATHWATCH**  operative's activation, before or after it performs an action, if it's not within control range of enemy operatives, you can use this rule. If you do, select one of the following:

- That friendly operative regains up to D3 lost wounds.
- Remove any changes to that friendly operative's APL stat.
- Remove one of the following tokens that friendly operative has (before that token's activation effects are resolved, if relevant): Neutron Fragment, Poison, Terrorchem.
