

KASRKIN FACTION EQUIPMENT

FOREGRIP

Fitted under the barrel of the gun, this foregrip helps stabilise the bearer's weapon, improving its handling at close range.

Whenever a friendly **KASRKIN**  operative is shooting an operative within 3" of it, ranged weapons on its datacard (excluding weapons that include 'pistol' in their name, e.g. hot-shot laspistol, all profiles of a plasma pistol, etc.) have the Accurate 1 weapon rule.
