<sup>1</sup>**Twin Torrent:** Select up to two different valid targets that aren't within control range of friendly operatives. Shoot with this weapon against both of them in an order of your choice (roll each sequence separately). Torrent 0" means you cannot select secondary targets, but this weapon still has the Torrent weapon rule for all other rules purposes, e.g. the Condensed Stronghold rule (see Killzone: Volkus, *Kill Team Core Book*).

**Sanctification Rack:** This operative can perform the **Sanctification Orb** action (see faction equipment). Doing so in this manner doesn't count towards the once per turning point limit (i.e. if you also select that equipment for other operatives).
