**No Escape:** Whenever an enemy operative would perform the **Fall Back** action while within control range of this operative, you can use this rule. If you do, roll one D6, subtracting 1 from the result if that enemy operative has a higher Wounds stat than this operative, and adding 1 if that enemy operative is wounded: on a 4+, that enemy operative cannot perform that action during that activation/counteraction (the AP spent on it isn't refunded).

**Extract Information:** Whenever an enemy operative is incapacitated within this operative's control range, you gain 1CP.
