Adaptive Orders: If this operative doesn't issue a **GUARDSMAN ORDER** as a **STRATEGIC GAMBIT**, you can use the Inspirational Leadership firefight ploy for OCP during this operative's activation.

Bring it Down!: STRATEGIC GAMBIT if this operative is in the killzone. Select one enemy operative. Whenever a friendly **DEATH KORPS** operative is shooting against, fighting against or retaliating against that enemy operative, that friendly operative's weapons have the Punishing weapon rule.

Bruiser: Once per turning point, when this operative is fighting or retaliating, in the Resolve Attack Dice step, you can ignore the damage inflicted on it from one normal success. If this operative is incapacitated during the **Fight** action, you can strike the enemy operative in that sequence with one of your unresolved successes before this operative is removed from the killzone.

Medic!: The first time during each turning point that another friendly **DEATH KORPS** operative would be incapacitated while visible to and within 3" of this operative, you can use this rule, providing neither this nor that operative is within control range of an enemy operative. If you do, that friendly operative isn't incapacitated, has 1 wound remaining and cannot be incapacitated for the remainder of the action. After that action, that friendly operative can immediately perform a free **Dash** action, but must end that move within this operative's control range. Subtract 1 from this and that operative's APL stats until the end of their next activations respectively, and if this rule was used during that friendly operative's activation, that activation ends. You cannot use this rule if this operative is incapacitated, or if it's a **Shoot** action and this operative would be a primary or secondary target.

Mine Layer: This operative is carrying your Mine marker. It can perform the **Pick Up Marker** action on that marker, and whenever it performs the **Place Marker** action on that marker, it can immediately perform a free **Dash** action.

***Detonate:** Don't select a valid target. Instead, shoot against each operative within 2" of your Mine marker, unless Heavy terrain is wholly intervening between that operative and that marker. Each of those operatives cannot be in cover or obscured. Roll each sequence separately in an order of your choice. This weapon cannot be selected if your Mine marker isn't in the killzone. At the end of the action, remove your Mine marker from the killzone. In a killzone that uses the close quarters rules (e.g. Killzone: Tomb World), this weapon has the Lethal 5+ weapon rule.
