

TEMPESTUS AQUILON

FACTION RULE

DROP INSERTION

When setting up a **TEMPESTUS AQUILON**  kill team before the battle, the first third of your kill team must be set up as normal. Each third thereafter can be set up above: place them to one side instead of in the killzone. For each third that's set up above, you must set up the whole third in this way (not some of them), then place one of your Drop markers wholly within your drop zone.

As a **STRATEGIC GAMBIT** in the first and second turning point, you can move your Drop markers up to 4" horizontally. In a killzone that uses the close quarters rules (e.g. Killzone: Tomb World), this can be measured and moved through Wall terrain.

In the Firefight phase, friendly **TEMPESTUS AQUILON**  operatives set up above are activated as normal. When you do, you can either expend or land that operative. If it lands, set it up in the killzone in a location it can be placed as follows (it's no longer set up above):

RULE CONTINUES ON OTHER SIDE
