

SCOUT SQUAD

FACTION EQUIPMENT

TARGETING OCULARS

These highly sensitive multispectral targeting visors serve to aid the bearer's aim, rendering their weapons even more lethal.

Up to twice per turning point, when a friendly **SCOUT SQUAD** operative is performing the **Shoot** action and you're selecting a valid target, you can use this rule. If you do, until the end of that action, that friendly operative's ranged weapons have the Lethal 5+ and Saturate weapon rules.
