

WOLF SCOUT

FIREFIGHT PLOY

COUNTERATTACK

The greatest hunters know never to waste the chance to make an unexpected lunge, their prey at its most vulnerable just as they strike.

Use this firefight ploy at the end of an enemy operative's activation, or after an enemy operative performs the **Fight** action. One friendly **WOLF SCOUT**  operative can immediately perform a free **Fight** action, but you cannot select any other enemy operative to fight against during that action.
