Medic!: The first time during each turning point that another friendly **EXACTION SQUAD** operative would be incapacitated while visible to and within 3" of this operative, you can use this rule, providing neither this nor that operative is within control range of an enemy operative. If you do, that friendly operative isn't incapacitated, has 1 wound remaining and cannot be incapacitated for the remainder of the action. After that action, that friendly operative can immediately perform a free **Dash** action, but must end that move within this operative's control range. Subtract 1 from this and that operative's APL stats until the end of their next activations respectively, and if this rule was used during that friendly operative's activation, that activation ends. You cannot use this rule if this operative is incapacitated, or if it's a **Shoot** action and this operative would be a primary or secondary target.
